It a comprehensive tool that can create convert and download Flash videos but unlike free utilities that only work with some web pages or file types or just with YouTube GetFLV can download almost all downloadable videos and from any video hosting page too.

If you have ever used any of the free flash video downloads the first thing you probably notice is GetFLV premium quality user interface.. As soon as it is introduced it is quite used to use but the tool is prepared with a step by step consumer information which seems so often to get rid of unpleasant conditions.

It also quickly and easily converts videos to play on iPhone or any other device and it packs some extras like Audio Ripper and FLV Fixer but you can repair damaged or corrupted files.. This built-in window allows you to securely search videos directly from the GetFLV port without having to add add-ons or tags to the default sandbox.. Additional shopping with the sidebar you will find a number of additional useful instruments that remind you of FLV Converter FLV Maker and FLV Audio Ripp.. FLV Maker and FLV Audio Ripper are very similar to the business just optimized to create Flash-Videos in the mail online and to process and save audio files from the video.
